**Dr. Raymond Moody, M.D.**

**at the San Francisco Swedenborgian Church**

### ***The Future of the Afterlife***

Are near-death experiences evidence of life after death? In this lecture, Dr. Moody describes the characteristics of the profound spiritual experiences of people who are revived after clinical death. He also presents insights into this mystery from great thinkers as diverse as Plato, Swedenborg, and Hume. Dr. Moody offers evidence that we are on the verge of revolutionary new discoveries relating to the biggest question of human existence: Is there life after death?

Dr. Moody is a world-renowned scholar and researcher. Dr. Moody is the leading authority on the 'near-death experience'—a phrase he coined in the late seventies. Dr. Moody's research into the phenomenon of near-death experience had its start in the 1960's. The New York Times calls him "the father of the near-death experience."
